SPECIALIST ACCESSORIES

Off-Road Pursuits - On the road style

For the enthusiasts amongst you, in our specialist section you will find a selection of our Terrafirma products, complemented by performance enhancement, equipment for expeditions, winching, towing and both interior and exterior trim.

TerrafirMa

From the Latin: meaning - Solid Earth

Shocks & Dampers

The Terrafirma range of Land Rover accessories has been created to meet the demands of Land Rover enthusiasts and is distributed Worldwide through Allmakes 4x4 authorized parts and accessory dealers.

Terrafirma offers choice, clear product identification and application, ensuring the correct product can be selected from the extensive and increasing range of accessories.

To satisfy the diverse requirements of 4x4 owners both on and off road we have produced an amazing selection

of accessories for Land Rovers. The biggest category in the Terrafirma range is 'Suspension' which includes the largest range of upgrade shock absorbers,

steering dampers, coil springs and suspension hardware available in the marketplace.

Other Terrafirma products also include: Performance exhausts, cross drilled and grooved brake discs, Terrafirma Power Plug diesel power upgrades, reinforced steering rods & adjustable panhard rods, winch mounts & bumpers, rock sliders & under-body protection and with many new products being evaluated and tested for introduction in the near future Terrafirma is fast becoming one of the most recognized 4x4 accessory brands in the World.

To view the full range of Terrafirma accessories go to www.terrafirma4x4.com

On this site you will also find many products from leading manufacturers such as Lightforce, Green Cotton, Front Runner, Safari, Optima, Safety Devices, Superwinch, Mantec, ARB, Warn and many more, making Allmakes 4x4 a market leader in specialist Land Rover accessories.

Quality, Value and Performance

Allmakes Accessories - SELECT THE RIGHT GEAR

Shock Absorber for 90/110/D1/RRC

A tough twin tube design allows for a large volume of oil for cooler internals and improved protection of working parts. Low-pressure nitrogen eliminates cavitation and provides optimum oil viscosity for greater resistance to fade. Special internal bump stops preserve the internal piston from impacts in extreme conditions. High quality deep silver powder coated finish resists corrosion for long lasting good looks.

Front - TF116

Rear - TF117

Shock Absorber for Discovery 2

Featuring a tough twin tube design allowing a large volume of oil for cooler internals and improved protection of working parts. Special internal bump stops preserve the internal piston from impacts in extreme conditions. Low-pressure nitrogen eliminates cavitation and provides optimum oil viscosity for greater resistance to fade. High quality deep silver powder coated finish resists corrosion for long lasting good looks.

Front - TF118

Rear - TF119

Shock Absorber for P38

Tough twin tube design allows for a large volume of oil for cooler internals and improved protection of working parts. Low-pressure nitrogen eliminates cavitation and provides optimum oil viscosity for greater resistance to fade. Special internal bump stops preserve the internal piston from impacts in extreme condition. High quality finish deep silver painted finish resists corrosion for long lasting good looks.

Front - TF125

Rear - TF126

Steering Dampers

A tough twin tube design allows for a large volume of oil for cooler internals and improved protection of working parts. Low-pressure nitrogen foam cell for increased performance.

50/50 valving for equal damping lock to lock. 36mm piston, 54mm outer tube and 16mm shaft diameter. High quality deep silver powder coated finish resists corrosion for long lasting good looks.

Coil Springs

Terrafirma coil springs are designed to provide approximately 2" of lift under a variety of different loads. Improvements are achieved in load carrying, ground clearance and towing both on and off road. All springs are made from the highest quality steel and have been shot peened and scragged to ensure long spring life. Springs are then powder coated Terrafirma silver for long lasting good looks.

Terrafirma 2" Lift Kits available for:

TerrafirMa Suspension quick application guide

Please note: all lifts shown in this guide are approximate. The actual lift will vary depending on the load carried and your individual vehicle set up. Increasing the load will reduce the lift, using a heavier spring with less load will increase the lift but may effect wheel travel.

TerrafirMa brakes offer increased bite from cold and excellent fade resistance in most 4WD braking situations. Whether it's a steep rocky descent, ploughing through mud and water or just daily driving, the brakes will give excellent performance.

Using **TerrafirMa** cross-drilled and grooved brake discs stopping in all conditions will be further improved. Grooves are machined into the brake disc to force away the dust and gasses that build up between the pad and disc, keeping the brakes cooler and reducing fade. The cross drillings contribute to cooling and heat dissipation and also allow the gasses to escape.

ACCESSORIES AND UPGRADES FOR LAND ROVER VEHICLES

Now available...

The New Terrafirma Accessories Brochure

The new brochure for 2010 features Terrafirma's complete range of suspension and hardware upgrade accessories. It incorporates many of the leading worldwide off-road brands as featured below; providing you with a unique one stop for all your Land Rover off-road kit.

www.terrafirma4x4.com

Quality, Value and Performance

All Makes Accessories - SELECT THE RIGHT GEAR

TerrafirMa Power Plug

*"The intelligent vehicle
enhancement"*

The TerrafirMa Power plug is a highly developed, pre-programmed state of the art performance upgrade that works in conjunction with the engine management system already fitted to all post 1998 diesel Land Rovers.

The result is improved engine efficiency. Commonly known as 'plug and play' the Power plug is quite straightforward to fit and will give instant results, better performance and mpg!

For serious off-roaders we also offer an extension loom for Defender and Discovery Td5 allowing the ECU to be relocated high up in the vehicle.

TerrafirMa serious 4x4 accessories

Coloured Silicone Hoses

Silicone intercooler and turbo hoses are designed to thrive on the high pressures and extreme temperatures found in high performance engines. As such they will perform better and last longer, especially if your Land Rover diesel engine has enhanced performance.

All our hoses are manufactured from high grade silicone polymer, and reinforced with a high strength polyester fabric. This gives an operating temperature range of between -40°C to +180°C.

With polyester reinforcement and thicker construction, TerrafirMa silicone intercooler and turbo hoses are far superior to standard hoses and also look fantastic too in bright blue, lime green and orange colours.

Terrafirma Exhaust Pipes

serious 4x4 accessories

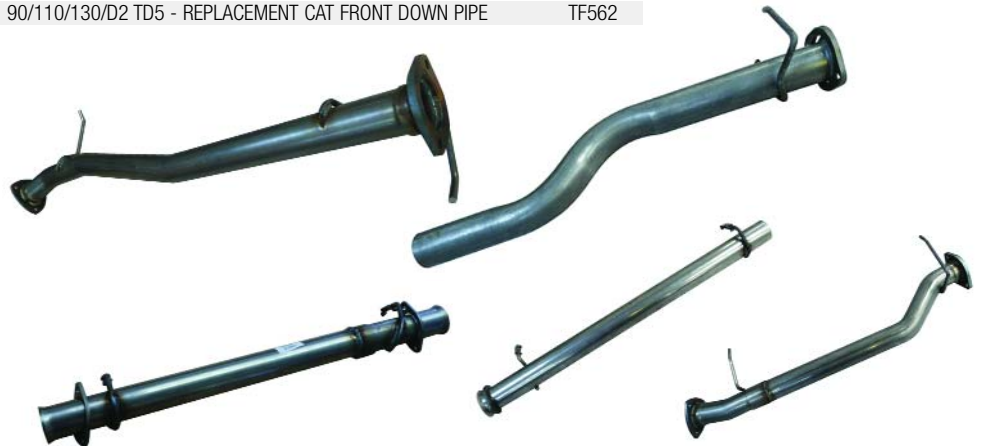

The Terrafirma range of 'de-cat' down pipes and silencer replacement pipes are intended to improve the performance and economy of diesel Land Rovers.

Save a fortune when your catalytic converter fails by fitting a Terrafirma 'de-cat' down pipe and enhance the performance and economy by de restricting the exhaust system.

Remove the power de-restricting and vulnerable centre silencer and fit a Terrafirma silencer replacement pipe and enjoy the new throaty exhaust sound.

Made from 1.5mm 409 stainless steel these pipes should considerably outlast the life of the original system. Guaranteed for 10 years.

High Performance Air Filters

*The No.1
motor sport
air filter
in the world!*

Most filters use a simple pressure moulded injection process to bond the perimeter rubber to the filter. This results in rubber seeping onto the filter surface, creating a barrier.

This barrier can reduce surface area by up to 10-15% thus decreasing the amount of air flowing through the filter and reducing performance.

Green Cotton air filters use a more time-consuming and precise production process that virtually eliminates rubber seepage onto the filter surface, thus maximising air flow and increasing engine performance!

The deep pleats in the double-layered cotton create a 10-20% increase in filtration surface area. This increase allows a greater volume of air to move more freely into the engine.

Shock Absorbers - Options...

AllMakes4x4 Allmakes shock absorbers Quality, Value and Performance

Allmakes 4x4 quality shock absorbers are manufactured by OEM suppliers.

All of our suspension options are designed as oil or gas replacements to the standard shock absorber fitted by the manufacturer, so we use standard part numbers where possible.

For those shock absorbers fitting multiple applications, we apply a new part number - see following Fitting Guide.

- Superb value - competitive prices
- Manufactured by an OEM supplier
- Adhere to strict safety-critical quality standards
- Direct replacement dampers and rationalised dampers that fit multiple applications available

De Carbon shock absorbers

High performance mono tube high pressure gas

- Better fade resistance
- Since there is no outer tube, cooling is much better which gives a drastic reduction in fade, thus more consistent handling and control
- Better durability
- Single-tube construction also allows for a larger internal working area, reducing stress and fatigue for better durability
- De Carbon's monodisc valving system features a single moving part that drastically reduces inertia and friction, to improve durability and performance
- Better cooling of the mono tube design results in lower operating temperatures and thus longer life
- No need for re-adjustment
- The viscosity of hydraulic fluid changes as temperature changes. The high pressure gas compensates immediately and automatically for changes in viscosity

BOGE shock absorbers

Comfort and safety first

BOGE has been chosen by the world's leading vehicle manufacturers as original equipment for consistent superior ride-control with the highest quality. BOGE products are built to exacting standards leaving no room for shortcuts or compromise.

- Improved braking (up to 20%)
- Significant noise reduction
- Optimal driving comfort
- Constant performance
- Superior ride control
- Reduced tyre wear
- Lifetime guarantee
- Safety

Delphi shock absorbers

High pressure damper utilising single bore technology

- An OEM supplier to Land Rover
- Exclusive monodisc design- isolates vehicle ride without sacrificing handling
- Easy assembly to vehicle- can be mounted at any angle
- Lighter weight -29% lighter than equivalent twin tube designs
- Eliminates lag and fade- better wheel and body control
- Also available in controlled ride applications - automatically maintains vehicle height as well as automatic adjustment to road conditions

Monroe Adventure Shock Absorbers

Freedom with maximum control, performance and safety

- High performance on-road and off-road
- Adapted to heavy duty conditions
- Optimum damping control that ensures a superb tyre to road contact
- Maximum efficiency
- Strong and durable

Polybush Kits

The most comprehensive range of polyurethane suspension bushes for Land Rover vehicles.

With 3 grades available it is possible to select the perfect bushes for any application and working environment. Increased durability, tear and shear resistance, together with the usual polyurethane benefits of long life and resistance to oils and fluids.

Classic or Performance.

The red bushes are produced from a stiff material providing a firm, taut precise ride. Ideal for sports or heavy-duty commercial applications.

Comfort.

The blue bushes closely resemble the comfort of the original rubber bushes with increased resilience and performance in extreme conditions.

Dynamic.

The new orange bushes are designed to meet the requirements of modern 4x4 vehicles comfort and flexibility combined with firm precise handling. Most of the competition range of bushes have also been produced using this unique material.

Complete kit sets do not include A-frame ball joint bush nor shock absorber bushes but these can be ordered separately.

Superwinch Electric Winches

Superwinch winches are trusted by professionals and weekenders alike, Superwinch having produced over two and a half million winches in the last 35 years. Their winches are available in capacities up to 16500lbs and we have selected a range suitable for all 4x4 vehicle self-recovery applications.

Superwinch LP8500 - 1585200

- | | |
|--|------------------------------|
| 3.8 tonne single line pull | Automatic load holding brake |
| 3-stage planetary gearbox | Sealed contactor switching |
| Free spool clutch for fast wire payout | Hook handling strap |
| Durable handheld remote control | 100ft High tensile wire rope |
| Fully pre-wired ready to connect | Circuit breaker protected |
| Heavy-duty 4.5hp series wound motor | Heavy-duty hawse fairlead |

Superwinch EP9 - 09032CE

- | | |
|--|------------------------------|
| 4.1 tonne single line pull | Automatic load holding brake |
| 3-stage planetary gearbox | Sealed contactor switching |
| Free spool clutch for fast wire payout | Hook handling strap |
| Durable handheld remote control | 125ft High tensile wire rope |
| Fully pre-wired ready to connect | Circuit breaker protected |
| Heavy-duty 4.6hp series wound motor | Heavy-duty roller fairlead |

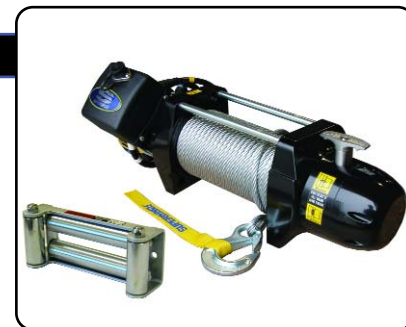

Superwinch EPi9 - 09034CE

- | | |
|--|------------------------------|
| 4.1 tonne single line pull | Automatic load holding brake |
| 3-stage planetary gearbox | Sealed contactor switching |
| Free spool clutch for fast wire payout | Hook handling strap |
| Durable handheld remote control | 125ft High tensile wire rope |
| Fully pre-wired ready to connect | Circuit breaker protected |
| Heavy-duty 4.6hp series wound motor | Heavy-duty roller fairlead |

Superwinch EP9.5 - 658005

- | | |

| 4.3 tonne single line pull | Automatic load holding brake |
| 3-stage planetary gearbox | Sealed contactor switching |
| Free spool clutch for fast wire payout | Hook handling strap |
| Durable handheld remote control | 100ft High tensile wire rope |
| Fully pre-wired ready to connect | Circuit breaker protected |
| Heavy-duty 5.0hp series wound motor | Heavy-duty roller fairlead |

Superwinch EPi9.5 - 658007

- | | |
|--|------------------------------|
| 4.3 tonne single line pull | Automatic load holding brake |
| 3-stage planetary gearbox | Sealed contactor switching |
| Free spool clutch for fast wire payout | Hook handling strap |
| Durable handheld remote control | 125ft High tensile wire rope |
| Fully pre-wired ready to connect | Circuit breaker protected |
| Heavy-duty 5.0hp series wound motor | Heavy-duty roller fairlead |

Superwinch EP12.5 & EP16.5 - 658001 & 658003

- | | |
|--|---------------------------------|
| 5.7-7.5 tonne single line pull | Automatic load holding brake |
| 3-stage planetary gearbox | Sealed contactor switching |
| Free spool clutch for fast wire payout | Hook handling strap |
| Durable handheld remote control | 90-125ft High tensile wire rope |
| Fully pre-wired ready to connect | Circuit breaker protected |
| Heavy-duty 5.6hp series wound motor | Super-duty roller fairlead |

Superwinch Husky 8 - 8514

- | | |
|--|------------------------------|
| 3.8 tonne single line pull | Automatic load holding brake |
| Worm drive gearbox | Sealed contactor switching |
| Free spool clutch for fast wire payout | Hook handling strap |
| Durable handheld remote control | 150ft High tensile wire rope |
| Fully pre-wired ready to connect | Circuit breaker protected |
| Heavy-duty 4.2hp series wound motor | Super-duty roller fairlead |

NEW Superwinch 1120149 - Portable LT2000 Winch on powder coated winch platform now available.

Warn Electric Winches

Warn is probably one of the world's most recognised brands in off road products. Warn have been producing winches for over 45 years and are synonymous with off roading. Their winches are produced with quality and performance in mind and several have unique features such as a built-in high performance compressor.

Warn 9.5XP - 86500

The fast powerful Warn 9.5xp is designed for the serious off-roader who demands a winch that will perform under the most extreme conditions in the world. A powerful 4.6hp motor generates 9,500lbs of pulling power with the longest duty cycle and fastest line speed of any WARN winch when under load. 7.6ft per minute under 9500lbs load.

Warn 8274-50 - 88631

Still has the fastest no-load line speed (73.4 feet per minute) and the longest rope (150ft) in the WARN range. The M8274-50 is the preferred winch for off-road challenge events. Its unique gearbox and upright design has proven to be strong & reliable, and its braking system delivers smooth operation with excellent heat dissipation. With a pulling capacity of 8500lbs the 8274 is the off road competitor's choice.

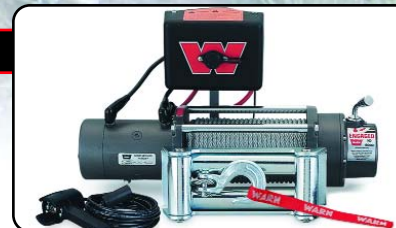

Warn XD9000i - 27550

There are more XD9000i winches fitted on off-road vehicles than any other winch. 9000lbs capacity, 125ft of wire, a no load line speed of 34ft per minute and 3-stage planetary gearing, and the ability to run cool with low amp draw for long winching cycles are just a few reasons why.

Warn XD9000 - 88500

A long-time best seller, the XD9000s compact size and separate control pack let it work effectively in very tight spaces. It uses the 4.6hp Series Wound motor producing 9000lbs of pulling power through 100ft of wire, torque and line speed are outstanding.

Warn XDC - 74700

A low profile and compact shape to fit a wide variety of bumpers and mountings in particular discrete mounts on modern 4x4s. It has a 9,500lb line rating with 100ft of wire and an extreme duty cycle for long, efficient pulls. Other features include a 4.6hp Gen II motor, thermometric protection and a hand held remote control with a built-in torch.

Air Accessory Kit - 73945

Air accessory kit includes HD inflator, set of four tyre deflators, 25mtr extra hose, couplings and bag for storage.

Winch Remote Control - 76080

Suitable for all Warn Winches.

ARB

An assortment of high quality recovery equipment, appropriately selected to suit your 4x4 and

environment, is essential when venturing off the beaten track. Vehicle recovery is a major part of offroading. Without the right equipment, it can become frustrating and even dangerous, but if you're properly prepared, it becomes a challenging yet rewarding experience. Don't trust your vehicle to substandard recovery products that could jeopardise your and your vehicle's safety. ARB's vehicle recovery accessories are engineered and manufactured to the highest standards, making them ideal for recreational use as well as competition.

Speedy seal puncture repair kit - 10000010

The ARB Speedy Seal Puncture Repair Kit quickly and easily repairs tubeless tyres without having to remove the tyre from the vehicle or the wheel.

E-Z Tyre Deflator - ARB505

The unique, patented design of the ARB E-Z Tyre Deflator allows for removal of the valve core for rapid deflation of very large tyres and accurate tyre reading. The Bronze Bourdon Tube gauge design ensures accuracy is not affected by changes in temperature, humidity, or altitude, and is protected by a vinyl boot. The dial is large and legible, and provides accurate pressure readings in 1 PSI increments from 4 to 60 PSI. Protective canvas pouch and instruction sheet are included.

Tree Protector 3m - ARB730 5m - ARB735

The ARB 12,000 KG Tree Trunk Protector is constructed of green polyester so that the user may differentiate it at a glance from the orange-colored ARB Snatch Straps and the purple-colored ARB Winch Extension Strap. The ARB Tree Trunk Protector is 3" wide and 10' long, and reinforced with cordura on the end loops to prevent chafing. Two moveable sleeves on the main section prevent chafing of the polyester material under various rigging configurations. Withstands 25,000 pounds of load. Vehicle recovery booklet included.

Recovery strap 8000kgs - ARB705

These ARB Heavy Duty Snatch Straps are constructed of nylon with a 20% elasticity and are reinforced with cordura on the end loops to prevent chafing from prolonged heavy use. Two moveable sleeves on the main section prevent chafing of the nylon material under various rigging configurations.

ARB705 - 2" x 30' - 8,000 KG (17,500 pounds) maximum load.
ARB710 - 3" x 30' - 11,000 KG (24,000 pounds) maximum load.

All Makes Accessories - SELECT THE RIGHT GEAR

Recovery Winch Extension 4500kgs - ARB720

The ARB Winch Extension Straps are designed for extending the length of your winch cable when the most suitable anchor point is out of reach. They are reinforced with cordura on the end loops to prevent chafing. Two moveable sleeves on the main section prevent chafing. The Strap is constructed of non-stretch polyester, in purple to differentiate this strap from other straps.

ARB720 - 2" x 66' - 4500Kg (9,900 pounds) maximum load.
ARB725 - 2" x 66' - 8000Kg (17,500 pounds) maximum load.

Recovery cable damper - ARB220

The ARB Winch Cable Damper, when fitted to a rigged winch line, greatly diminishes winch line fling in the event of a winch line or anchor failure. The ARB Winch Cable Damper is manufactured from heavy-duty vinyl and Velcro, and features internal storage pockets to facilitate carry of pulley blocks, shackles, tree straps, and other recovery gear from your vehicle to the anchor point.

Snatch block 9000kgs ultra light - 10100020

Even the most powerful winches sometimes need a helping hand. Double the pulling capacity of your winch with the ARB Snatch Block 9000. The unit scissors open to enable the insertion of a winch line. The Snatch Block 9000 features a 20,000 lb. working load limit.

Snatch block 14500kgs - ARB209

A snatch block is one of the most useful items of recovery gear that you can carry. The ARB snatch block incorporates an original feature of a greasable, hardened steel pin and easy glide side plates.

Adventure light 12v with canvas bag - ARB225

The 4x4 Adventure light is a tough, compact and lightweight 12v fluorescent light, suited to numerous outdoor activities. The light intensity is simply stunning, yet the Adventure light draws a current of just one Amp from your standard 12 volt power socket in your vehicle, or a portable battery pack. It comes with a 5 metre power lead incorporating a power switch and hanging points.

110 ARB

111 ARB

The versatile Hi-lift Jack and related accessories are designed for situations requiring lifting, pushing, pulling, winching and clamping in the toughest environments.

XT485 4ft Extreme Jack - GHL4XT

HL485 4ft Hilift Jack - GHL4
HL605 5ft Hilift Jack - GHL5

HKR Handle Keeper Red - GHL6

JP350 Jack Protector - GHL4/5BAG

4xRAC Mounting Kit - GHL2

LR200 Mounting Kit - GHL3

ORB Jack Base - GHL4/5BASE

LM100 Wheel Lift Mate - GHL8

JA5002 Jack Adaptor - GHL4/5A

FK1 Service Kit - GHL4/5REP

Mammoth chequer plate - simply the best 3mm alloy chequer plate treadplate in the aftermarket!

Mammoth take pride in their manufacturing process, and every piece is hand-checked prior to packing. It is the only product in the market which has been chamfered and de-burred to give a quality finish like no other.

The range of chequer plate from Mammoth is unrivalled with options and variations to suit all Defender models and styles since production began. Choose between uncoated, silver anodised and black powder coated to match or contrast the body colour of your Defender.

Every kit is supplied with a set of stainless steel countersunk nuts and bolts for the perfect fitted finish.

The same foam backing membrane supplied by Land Rover is also available to apply to the wing tops and as optional extra for that 'factory' finish.

Few break free from the pressures of conformity to the accepted rules. To do so convention must be challenged and existence redefined. Once boundaries are rejected it is possible to believe that the world can be changed. Kahn Design was created to challenge convention and redefine ideals.

'Kahn' had a passion for cars and used his eighteen years experience in the automotive industry to create the Kahn Brand. Every product is designed to make a statement in itself, while perfectly integrating with the vehicles existing aesthetics.

ALL

Jerry Can - GJC10

10 litre green jerry can.

ALL

Jerry Can - GJC20

20 litre green jerry can - GJC20
20 litre red jerry can - GJC20R
20 litre blue water can steel - GJC20W

ALL

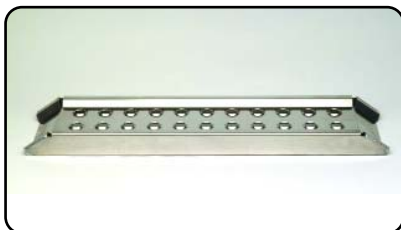

Jerry Can Seal - GJC99

Rubber seal for all jerry cans.

ALL

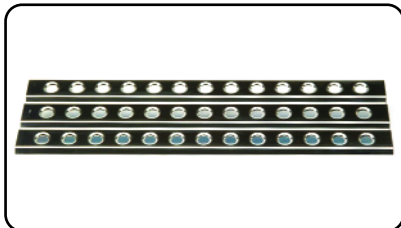

For other expedition equipment and accessories please see the Specialist Section in this brochure on page 87.

Bridging Ladders - GMN040

Mantec Heavy Duty 4mm aluminium bridging ladders (150cm long x 39cm wide x 10cm thick).

ALL

Sand Tracks - GMN041

Mantec Sand Tracks are 1.5m long, made from 4mm aluminium and are tried and tested in the Sahara Desert.
Sand Track Mounting Brackets (4-STMB).

ALL

Optima Red Top starter battery - RTS4.2

The Optima Red Top starter battery is ideal for all heavy duty starting and winching applications, remarkable power when compared to much larger conventional batteries.
815 cold cranking amps, 12volts, 100min reserve capacity, capacity 50ah.

ALL

Optima Yellow Top deep cycle battery - YTS4.2

The Optima Yellow Top deep cycle battery is ideal for extreme conditions where prolonged discharge is expected such as competitive winching, powering hi-fi and when used as an auxiliary battery in dual battery systems.
765 cold cranking amps, 12volts, 120min reserve capacity, capacity 55ah.

ALL

Front Heavy Duty Rubber Mats - GMS030

Universal Extra HD rubber mat, sold singularly and may require some trimming to suit the footwell.

ALL

Rear Heavy Duty Rubber Mats - GMS040

Universal rear rubber mat, supplied singularly and may require some trimming to suit the footwells.

ALL

Carpet Mats - GMS015

Duraguard mats - universal, rubber backed, non slip, carpet faced mats. These mats may require some trimming to suit the footwells. Supplied as a set of 4.

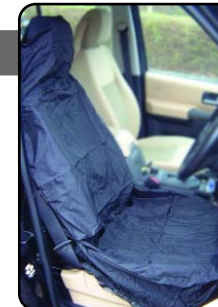

ALL

Waterproof Seat Cover - GSC001

Single black waterproof elasticated easy fit seatcover.

ALL

Trailer Board - GTB002

4'6" trailer board with 6m cable & "E" approved rear fog lamp and reflectors.

ALL

Roof Bars

Mont Blanc, fully galvanised roof bars/roof bar systems:-

Freelander - long roof bars for vehicles with roof rails - 404U

Discovery 1 - long roof bars for vehicles with roof rails - 404UL

Discovery 3 - three part roof bar system
(apart from vehicles with roof rails) - BU2/FK120/126

Range Rover P38 - long roof bars for vehicles with gutter - 405UL/K00

Range Rover L322 - three part roof bar system
(apart from vehicles with roof rails) - BU2/FK159/126

Range Rover Sport - three part roof bar system
(apart from vehicles with roof rails) - BU2/FK13/126

ALL

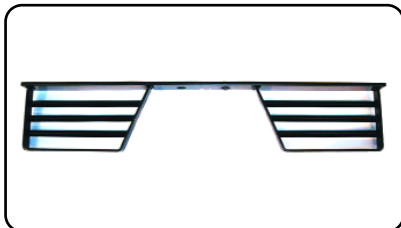

Bike Carrier - CM08

Mont Blanc, spare wheel tyre mounted, bike rack.
Spare wheel cover must be removed as the rubber of the tyre provides extra grip to the mounting function.
Fits any vehicle with rear door mounted spare wheel.

ALL

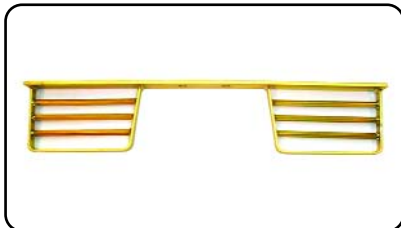

Tow Bar Step - GTS001

Black powder coated steel rear tow bar mounted step. Suitable for all towing kits.

ALL

Tow Bar Step - GTS002

Zinc plated steel rear tow bar mounted step. Suitable for all towing kits.

ALL

Tow Bar Step - GTS003

Black powder coated steel rear tow bar mounted step with an alloy tread top. Suitable for all towing kits.

ALL

Tow Bar Half Step - GTS004

Black powder coated steel half rear tow bar mounted step. Suitable for all towing kits.

ALL

Tow Bar Half Step - GTS005

Zinc plated steel half rear tow bar mounted step. Suitable for all towing kits.

ALL

Tow Bar Half Step - GTS006

Black powder coated steel half rear tow bar mounted step with an alloy tread top. Suitable for all towing kits.

ALL

Tow Ball - RTC8891AA

High quality standard 50mm towing ball.

ALL

Vehicle Safety Pack - AEK1

A comprehensive vehicle safety pack. This kit offers excellent value for money as it contains a first Aid kit, a 1kg fire extinguisher, a pair of gloves and a hi-vis jacket, all contained in a travel bag.

ALL

First Aid Kit - PTK1

One person travel kit containing a comprehensive range of essential first aid products.

ALL

Fire Blanket - SVB1

One use fire blanket.

ALL

Fire Extinguisher - PS1X/FM

A 1kg powder fire extinguisher. The container is made of aluminium which makes it light weight. It also includes a quick release bracket and gauge.

ALL

Security Box - GAL001

Lockable pedal security box. Fits all Land Rover models.

ALL

Land Rover Publications

Allmakes offers a range of technical publications on CD Rom. Each CD Rom focuses on one model or family of models and contains:

- Original parts catalogue
- Workshop manuals
- Driver's handbook

LHP1	Range Rover Classic, up to 1985
LHP2	Range Rover Classic, 1986 on
LHP3	Discovery 1, 1989 to 1994
LHP19	Land Rover Series I, 1948 to 1958
LHP20	Land Rover Series II, 1958 to 1961
LHP21	Land Rover Series IIA & IIB, 1958 to 1961
LHP22	Land Rover Series III, 1971 to 1985
LHP23	Land Rover 88 Half Ton Military, 1968 to 1984
LHP24	Land Rover 101 One Ton Military, 1975 to 1978
LHP25	Land Rover 90, 110 & XD Military, 1984 to 1999
LHP26	Land Rover 90, 110 & 127, 1983 to 1989
LHP27	Land Rover Defender 90, 110 & 130, 1990 to 1999
LHP28	Land Rover Defender 90 & 110 North America
LHP29	Range Rover Classic North America, 1987 to 1995
LHP32	Land Rover Discovery Series I, 1994 to 1998
LHP33	Land Rover Discovery Series I North America, 1994 to 1998

Allmakes Filter Kits

A complete range of high quality Filter Kits are available to suit your Land Rover 4x4 whether you're driving on-road or venturing off-road.

Part numbers for the filter kits work in this format: e.g FKRRC-3.5P-1 where FK is the prefix for all Filter Kits, RRC is the three letter vehicle identifier (Range Rover Classic in this example), -3.5P is the three letter engine reference (3.5 Petrol in this example), and -1 indicates that VIN-dependent alternatives exist for this particular vehicle/engine combination.

More information is included in the description to help identify the correct kit. Manufacturers Part Numbers used for reference only.

	Includes COOPERS Oil Filter		

For over 30 years the Allmakes Group has been specialising in the supply of high quality parts and accessories, suitable for all Land Rover vehicles.

We are currently the fastest growing independent Land Rover wholesaler in the world.

Our Customers

We supply Land Rover spare parts to independent wholesalers, fleet owners and workshops in 54 countries on 6 continents, directly from our headquarters in Oxfordshire where we house £7 Million of stock, providing 118,000 part options. In addition we are approved Land Rover parts suppliers to the British Armed Forces as well as other government organisations and NGOs worldwide.

Allmakes do not sell directly to private individuals. However details of our partners can be found on our website www.allmakes4x4.com

Our Products

Our extensive range of accessories offered in this catalogue has been developed as a complement to our spare parts range for all Land Rover vehicles. The range of spare parts we offer are categorised as follows.

GEN

Genuine Land Rover parts

Allmakes is an authorised parts distributor for Land Rover Ltd and, as such, has access to all the facilities that any other dealer anywhere in Europe will have. This means that Allmakes can provide its customers with a full range of genuine Land Rover parts at competitive prices.

OEM

Original Equipment parts

In order to offer our partners a high quality alternative to genuine parts, Allmakes has forged relationships with companies that supply Land Rover factories throughout the world. We ensure that OEM parts are offered at attractive prices. Where possible these are supplied in OEM image but if this is not available, such parts are classified as Allmakes OE.

ALL

Premium quality replacement parts

For fast moving parts, or for those that fit older vehicles, Allmakes understands the needs of its partners to have competitive offerings. To meet this demand Allmakes secures about 66% of its replacement parts from European suppliers, many of which supply to our unique specifications. Allmakes prides itself on offering the highest quality of replacement parts in our industry.

Quality

Allmakes is the only UK supplier to hold Lloyd's ISO9001:2008 accreditation for *"Storage, supply and delivery of genuine, original and replacement spare parts and accessories for vehicles manufactured by Land Rover"*.

This has enabled us to continually improve our internal processes and also to deliver market leading standards of customer service, along with the highest quality range of parts.

Peace of mind

Allmakes carries out extensive quality testing as part of the process for bringing new products into the range. Our quality commitment is further demonstrated by our 12 month guarantee on all products we supply.

Our clients have come to rely on our professional integrity and our ability to deliver parts that fit first time and ensure the safety of any Land Rover vehicle.

Environmental Aims

Most of our parts are sourced from within Europe, thereby helping us to reduce our carbon footprint, as part of our "green" commitment. In addition we actively implement recycling and repackaging within our processes.

Partnership

Allmakes has played an active role in the start-up, development and growth of many of our customers. Some of these now have annual sales of £2 - £3 million.

In addition we continue to invest in the marketplace through software, the internet, management and diagnostic technologies and most recently an online real-time ordering system that is available to account customers.

It is a core belief of the Company that in order for us to succeed we must understand and satisfy the real need of our customers. This means that we constantly listen to the opinions of our customers so as to match our customer service, product offering and marketing material to their needs.

Allmakes believes that it is important that its partners receive personalised support to maximise their profitability in their local marketplace and this is done via an experienced sales team.
